CS532 Web Science - EC 0.6: Reports

Denise Legister

October 24, 2026

1 Introduction

This report demonstrates the use of LaTeX to create a structured academic report for CS532 Web Science. It includes examples of document formatting, figures, code listings, tables, and references.

2 Figure

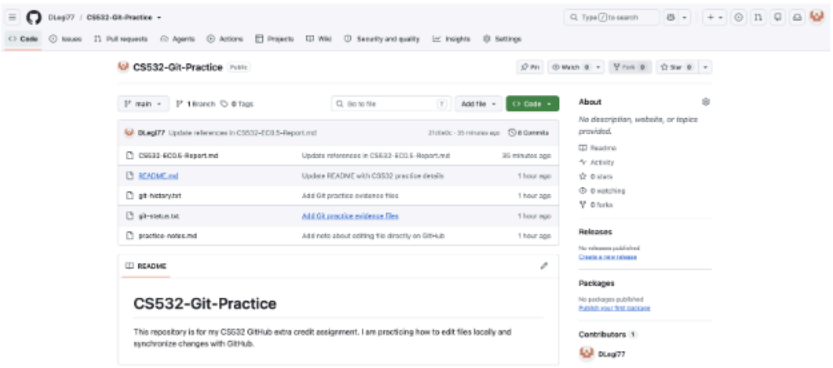

Figure 1: GitHub repository used for the CS532 Git and GitHub extra credit assignment

Figure 1 shows the GitHub repository created for the CS532 Git and GitHub extra-credit assignment. The repository contains the files used to practice version control and document the completed work.

3 Code Example

The following Git commands were used to save and upload changes to my GitHub repository.

```
git add README.md
git commit -m "Update README with CS532 practice details"
git push
```

4 Table

Table 1 summarizes the elements demonstrated in this report.

Git Command	Purpose
git add	Stages changes for the next commit.
git commit	Records changes in the local repository.
git push	Uploads local commits to GitHub.
git pull	Retrieves and integrates changes from GitHub.

Table 1: Git Commands Used and Reviewed During EC 0.5

5 References

The following resources were consulted:
